How to Use the EnergyGuide Label

Lists key features of the appliance you're looking at and the similar models that make up the cost range below.

What you might pay to run the appliance for a year, based on its electricity use and the national average cost of energy. The cost appears on labels for all models and brands, so you can **compare** energy use just like you would price or other features.

U.S. Government

Federal law prohibits removal of this label before consumer purchase.

Refrigerator-Freezer

• Automatic Defrost
• Side-Mounted Freezer
• Through-the-Door Ice

The maker, model, and size tell you exactly what product this label describes.

S67
\$57
Cost Range of Similar Models

The cost range helps you compare the energy use of different models by showing you the range of operating costs for models with similar features.

630 kWh
Estimated Yearly Electricity Use

Your cost will depend on your utility rates and use.

- Cost range based only on models of similar capacity with automatic defrost, side-mounted freezer, and through-the-door ice.
- Estimated operating cost based on a 2007 national average electricity cost of 10.65 cents per kWh.
- For more information, visit www.ftc.gov/appliances.

An estimate of how much electricity the appliance uses in a year based on typical use. Multiply this by your local electricity rate on your utility bill to better judge what your actual operating cost might be. If you see the ENERGY STAR logo, it means the product is better for the environment because it uses less energy than standard models.
